

VIRGINIA RAILWAY EXPRESS

Crystal City Station Improvements

The Virginia Railway Express (VRE) Crystal City Station, one of the busiest in the system, experiences crowding on the platform. The length and location of the platform causes an operational bottleneck on the railroad. The current phase of the VRE Crystal City Station Improvements project will identify a location in Crystal City for an expanded station with a longer platform served by two tracks. Key project goals are to provide easy transfers to Metrorail, Metroway, local bus, and bicycle and pedestrian facilities. The new station will provide opportunities to better align with Crystal City's vision for growth.

COMMUNITY MEETINGS

Wednesday, June 7, 2017

12:00-1:30 PM & 6:00-7:30 PM

(Presentations at 12:30 & 6:30 PM)

Gallery Underground

2100 Crystal Drive, Arlington, VA 22202

See the [Project Website](#) for directions & parking information

Join VRE at our June 2017 public meetings to learn about the Evaluation of the Proposed Options for the station location.

Information will be posted prior to the meetings at:

www.vre.org/development/crystal-city-station-improvements

Send written comments by June 16, 2017, via email to: ssoneji@vre.org

Or via mail Attention: Sonali Soneji, Project Manager

Virginia Railway Express, 1500 King Street, Suite 202, Alexandria VA 22314
