## REQUEST FOR QUOTES

### LORTON STATION PEDESTRIAN CROSSINGS

---

Below are questions VRE received as of May 27, 2026, with responses. Whenever possible, questions are presented as originally asked. Otherwise, the questions or inquiries are presented to capture the main thrust or idea.

1. Will surface grading be required?

Minor surface grading should be expected in order to properly install underlying railroad ties for support of the crossing.

2. Is there available space to lay down materials and supplies?

During construction, the contractor may make use of any area available at Lorton Station. However, any stored materials or supplies should be neat, tidy, and not placed in a way that would negatively impact ridership and their access to the platform surfaces. All materials **MUST** be removed from site at the completion of the project. Any damages to the grounds of the station shall be repaired by the contractor at completion.

3. What color crossing is acceptable?

Readily available colors of any kind are acceptable, however, the color selected shall be subject to final approval by VRE Project Manager.
