

## **SAFETY & SECURITY MESSAGE**

Safety and Security are two critical areas that contribute to VRE's success. Safe companies are better able to hire and retain the best employees, who in turn work to deliver a great commuting experience to passengers. Additionally, the region in which we operate is one of the most security-sensitive areas in the United States. Each of us must be constantly aware of our unique role in securing VRE and never become complacent.

# **INDUSTRY DAY 2019**

## **TODAY'S AGENDA**

- Safety Briefing
- Welcome by CEO
- Keynote Address
- Procurement Process
- Departmental Information
  - Operations/Mechanical
  - Planning, Design, CM and Construction
