

**Manassas Park Station Parking Expansion**

**Location Map**

VRE is conducting a study to address the need to expand the existing parking at Manassas Park station. The current study includes analysis of alternatives, environmental analysis, and design of the proposed parking facility. A three-level parking garage with approximately 560 spaces is proposed on the north side of the railroad tracks across from the Manassas Park City Hall on Park Center Court.

The project also includes a pedestrian bridge over the tracks connecting the garage to the existing VRE platform, an intertrack fence, and parking counters to provide real-time parking availability that will improve convenience and safety for riders.

Preliminary design and environmental analysis is currently underway. Final design is anticipated to begin in Fall 2017. Funding is being sought for construction.

**We Want Your Input.  
Write to us about -**

Would you plan to park in the new parking garage or the existing surface lot in the future?

Are the proposed finishes and building materials appropriate for this garage?

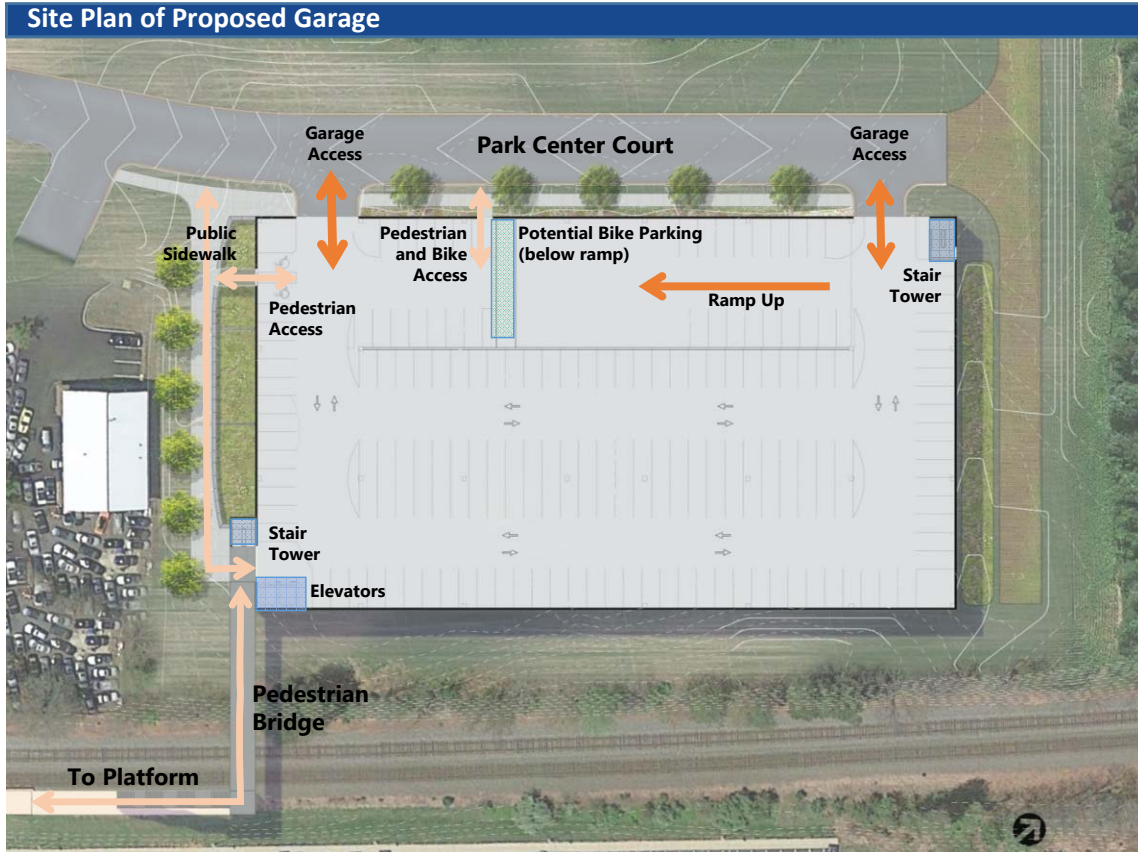

What other features would you like to see included in the garage?

Would you feel safe using the garage and pedestrian bridge to access the VRE platform?

Do you have any other questions or comments?
